

Claude Challenge: The OHDSI Summer School 2027

Data4Life AI Days · Day 1 · 11:00 Berlin / 17:00 Singapore · 60 minutes · Teams of five

Context:

D4L co-leads the OHDSI Germany national node (with TU Dresden and Medical University Lausitz / Carl Thiem Cottbus) and is driving the founding of OHDSI Germany e.V. Two real events are in planning: the **OHDSI Summer School 2027** and the **OHDSI Europe Symposium 2028**. Both already have a Slack home (#ohdsi-events-internal-orga), a Confluence space that is still an empty placeholder, and a speaker list close to empty.

Planning assumptions for today:

Your team builds a launch package in 60min to organize the OHDSI Summer School 2027:

- five days in Potsdam for 30 places
- Target group: PhD students, early-career researchers and clinicians
- The purpose of the summer school is adoption of Data2Evidence: at least half the faculty must be external, and success means participants leaving with D2E running on data they control.

Deliverables:

Deliverable	What good looks like
1 · Curriculum & agenda	- lectures in the morning - hands-on lab in the afternoon - one use case running through the week - final day for participant presentations - external speaker list
2 · Call for applications	- Landing-page copy plus the application form (eligibility, what applicants submit, selection criteria, deadline, fee or funding model) - Criteria select for data access and institutional weight (remember: adoption is the goal)
3 · Faculty briefing	- (a) An email (draft) to an OHDSI partner you want as faculty: what we ask (a lecture, a lab, mentoring one project group), the hours, what to prepare, what they get, why the week is worth their time - (b) A short internal mail to the D4L colleague giving one session (D4L hosts this school, but it does not run it)

Stretch:

- (4) teaching slides (5–8) for one session explaining why health data has to be standardised before it can answer anything
- (5) Participant handbook (a one-pager for participants): schedule, pre-requisites, what to install before day 1, what to bring
- (6) End-of-summer-school quiz (8–10 questions): an interactive dashboard quiz

Material:

- A folder with some material can be found here:
<https://drive.google.com/drive/folders/1F43ZWLuqKC33J-tmUhoNrFy2Dn1wwrea?usp=sharing>
- Note: use authentic material only (i.e. real photos, project stories, numbers, partner names, past event pictures).

Guardrails:

- Every artifact carries "WORKSHOP EXERCISE — not an announced D4L event".
- No real person is contacted today; both faculty mails stay drafts.
- No external logos in anything shareable; nothing on a public URL.
- The application form collects CVs and research topics (personal data). Write down whether it may enter the scoring agent, on what lawful basis, kept how long, visible to whom (required).

Where the output goes:

- Packages with all created material go into #ohdsi-events-internal-orga and the OHDSI Events 2027 & 2028 space.
